

Titan

Entrepreneurship
Grades 9-12

This unique business simulation for high school students will inspire young people to run sustainable businesses.

Through this online, interactive learning experience and competition, students in grades 9-12 learn about the fundamentals of creating a resilient business.

Learners will make daily business decisions and run a successful business in a virtual simulation.

In this hands-on competition, students become CEO of their own company and must create a business strategy and succeed in a highly competitive industry.

The JA Titan competition takes place over 10 days.

Students will:

-  Make key business decisions and develop the skills they need to run a sustainable business
-  Make critical production, pricing, marketing, research & development and capital investment decisions
-  Understand how to read and analyze business reports and lead a successful business
-  Create and achieve business goals
